ジグザ

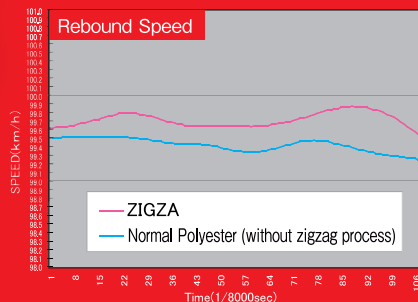

ジグザグ、ZIGZA

Zigzag shaped polyester string provides great elasticity and ball bite.

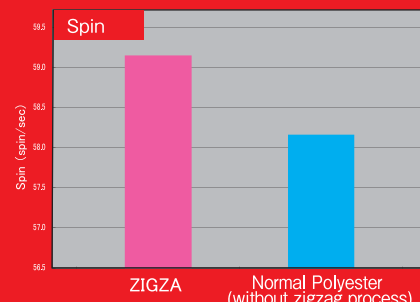

After the racket has been strung, the zigzag shape is smoother. The string energy returns to its original shape and provides outstanding elasticity and spin.

There are differences of rebound speed and spin after zigzag process.

This graph indicates Rebound Speed after impact. Zigza is faster due to the zigzag process.

This graph indicates Spin comparison between Zigza and Normal Polyester without zigzag process which is tested by high-speed camera.
